Commonwealth Lake Loop

Distance

.7 mi. (1.1km.)

Difficulty

1 (Most difficult = 10)

Beginning Point

Foothills Park

Conditions

(Best Conditions = 10)

Aesthetics - 5

Bad weather running - 10

Auto traffic - 10

Running Surface

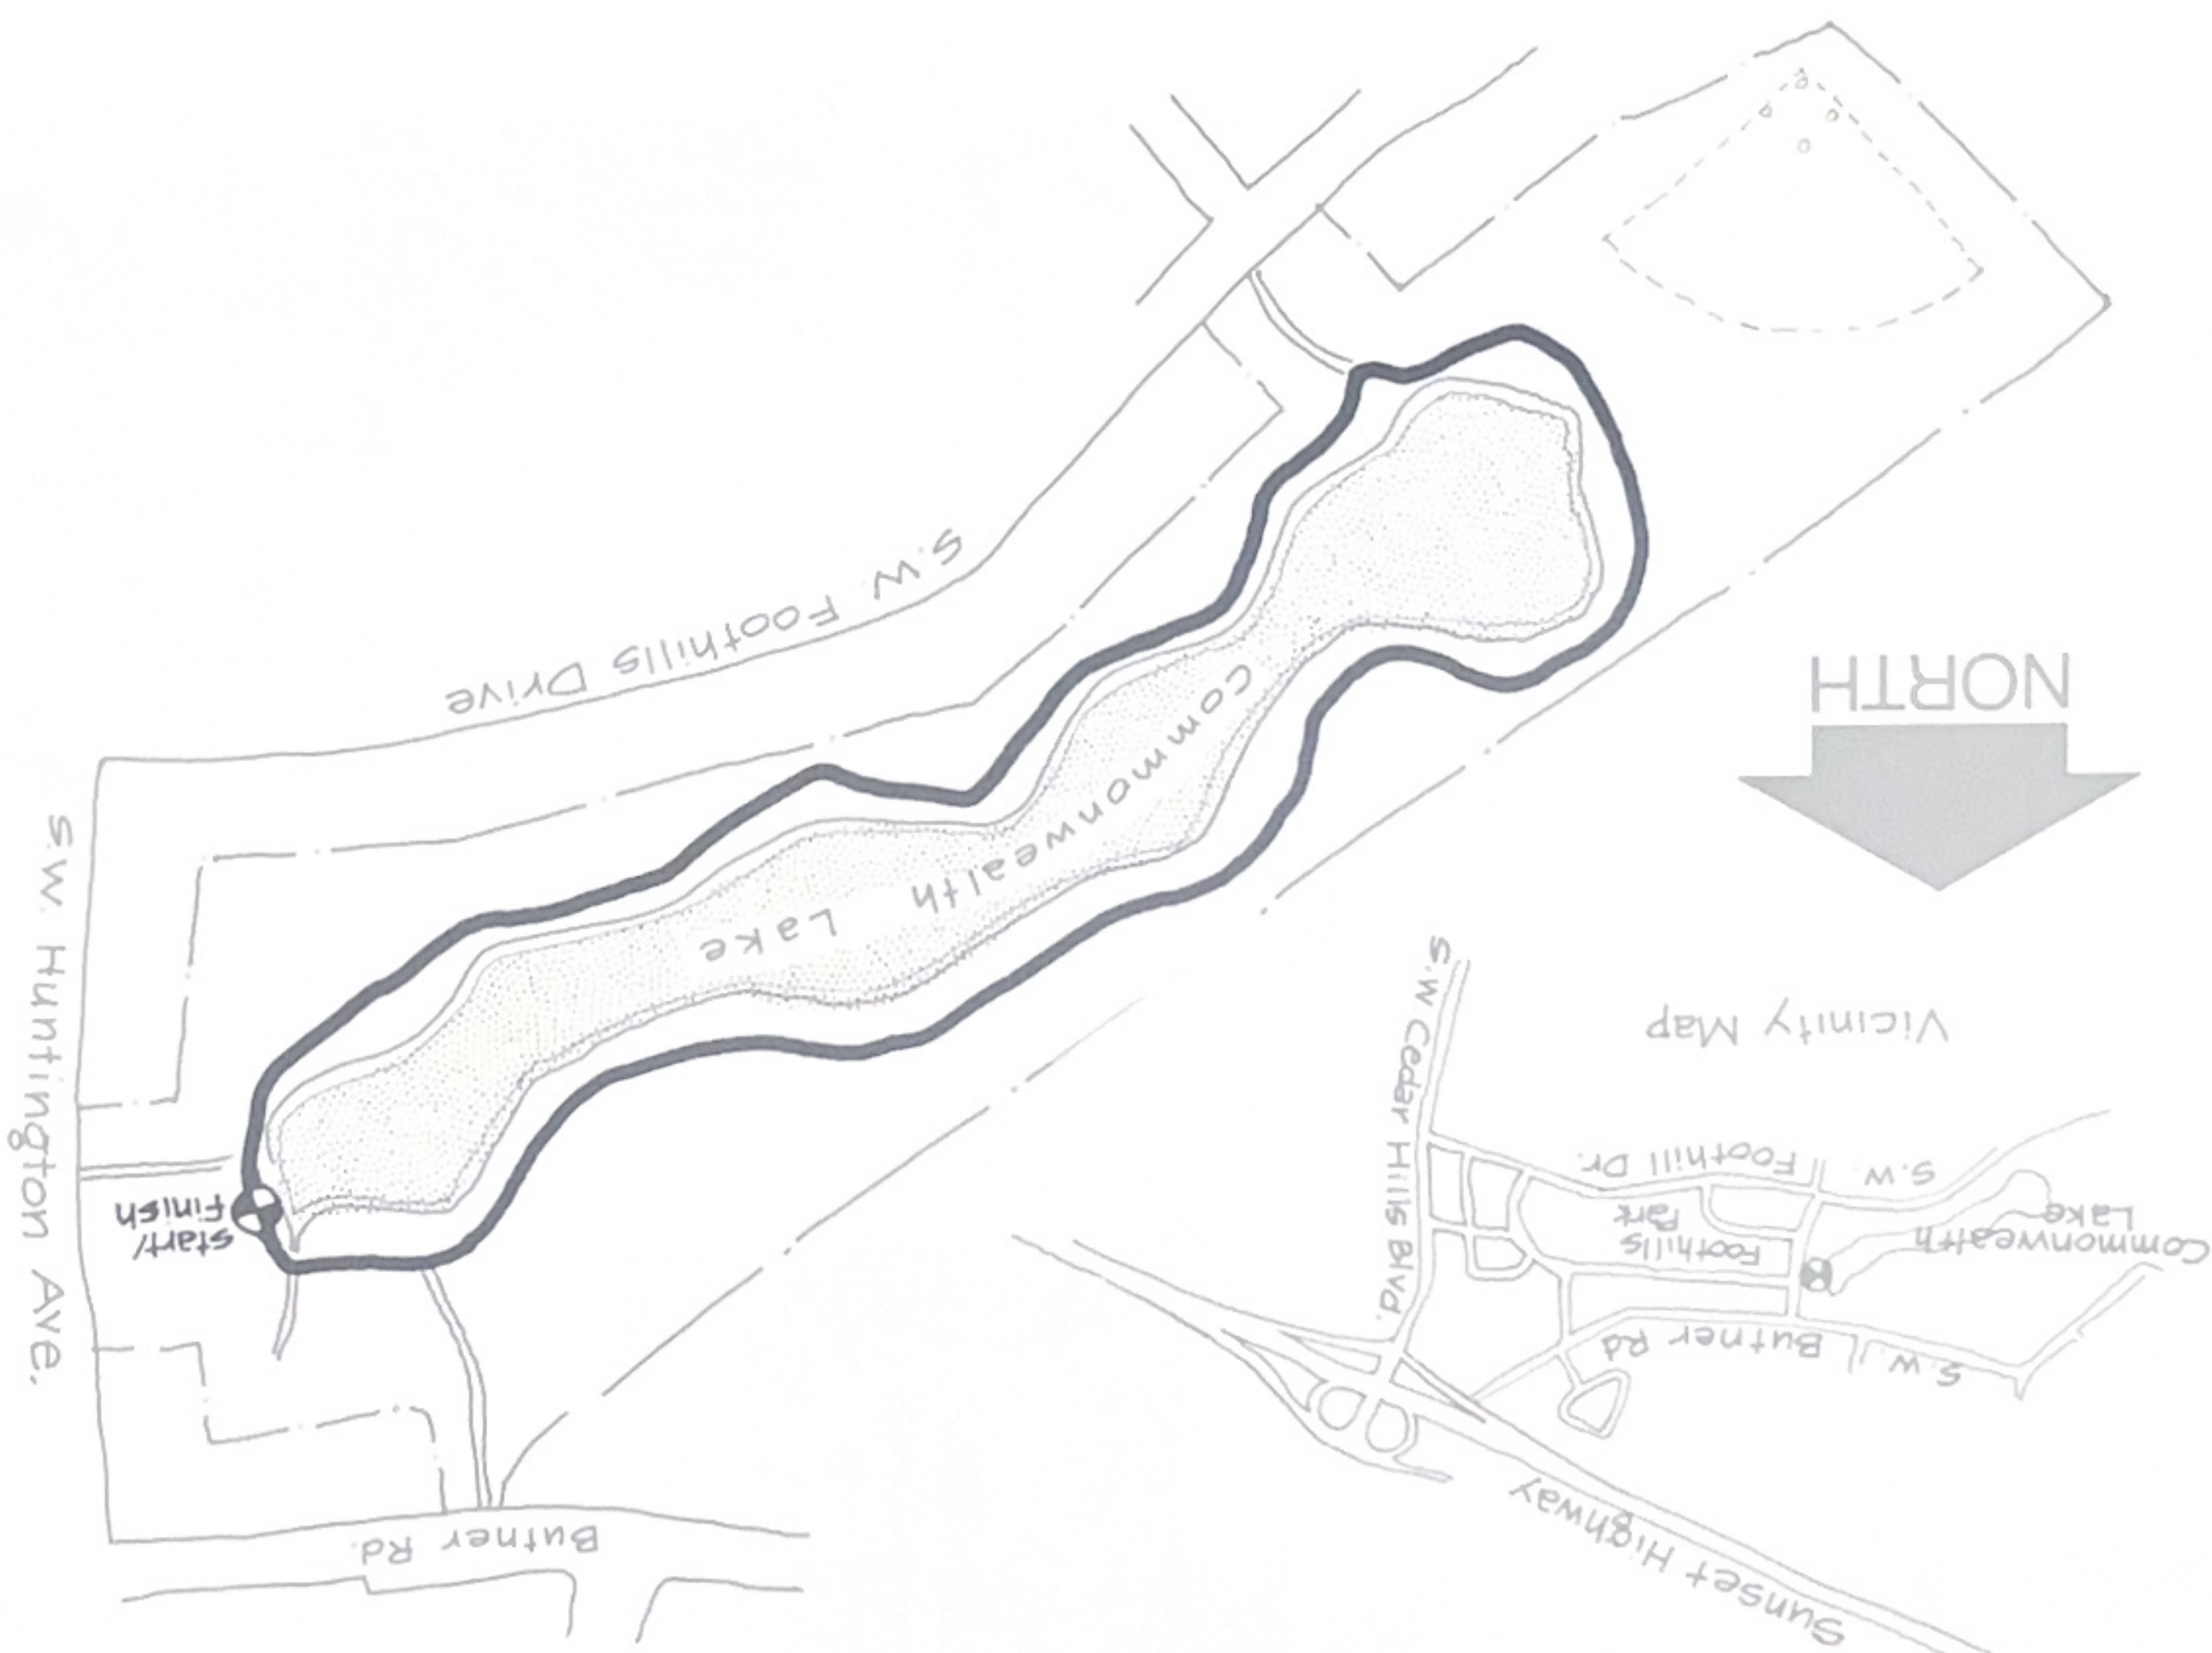

Paved asphalt path

This is short but sweet. It offers a good chance to combine a run with a family outing.

To get to this pretty little park tucked away in Cedar Hills, drive out Sunset Highway west and turn off at the Cedar Hills Boulevard exit. Follow the road around and under the highway and head south on Cedar Hills Blvd. Turn right at the second corner on S.W. Foothills Drive and follow it right into the park. Park on the street and walk a hundred yards or so down the paved path to the east end of the lake.

The trail circles the lake. Go around as many times as you want and enjoy this unusually tranquil oasis in bustling west side suburbia.

Greenway Park Loop

Distance

2.6 mi. (4.2 km.)

Difficulty

2 (Most difficult = 10)

Beginning Point

Parking place on S.W.

Hall Street

Conditions

(Best Conditions = 10)

Aesthetics - 5

Bad weather running - 8

Auto traffic - 10

Running Surface

Asphalt trail

Greenway Park, operated by the Tualatin Hills Parks and Recreation District, is a favorite noon-hour jogging area for many employees of the industrial park located right down the road. Take Highway 217 heading south to the Progress exit. Turn right, or west on Hall Street and park where the road widens by the Greenway Park sign on your left.

There are arrows painted on the paths, but to avoid getting confused, ignore them and follow our map to get the full 2.6 miles. Take the dog leg to the right and circle the tennis courts before coming back the same way. The trail goes through a marsh area that can be inundated with as much as 8 inches of water during rainy months, but you can pick your way around it.

Future plans call for extension of this fine park and trail system north and south along Fanno Creek. There are no water fountains or restrooms as yet.

37

This run will take you through some beautiful rural countryside that is all too soon becoming urbanized. Enjoy it while you can. The course straddles Sunset Highway. Elevation changes are slight and gradual.

Drive out Sunset Highway 10 miles west of Portland. Look for the huge Somerset West development on your right and turn off at the 185th exit. Turn left at 185th, cross the overpass and park in the Town Center parking lot on 185th.

Start running south on 185th to Cornell, following the map. Turn left on Cornell and parallel Sunset Highway for a short distance over rolling hills. Cross Sunset Highway and bear immediately left on Bronson. There's no sign indicating 174th, so watch on your left for the big green sign saying ALOHA-BETHANY NEXT RIGHT, and turn right at the street opposite the sign. Road shoulders are narrow in some places so you might have to change sides on occasion. After left turns at West Union Road and 185th, you will be headed back toward the Town Center.

The only facilities are at service stations near the 185th freeway exit.

Auto traffic - 5

Running Surface

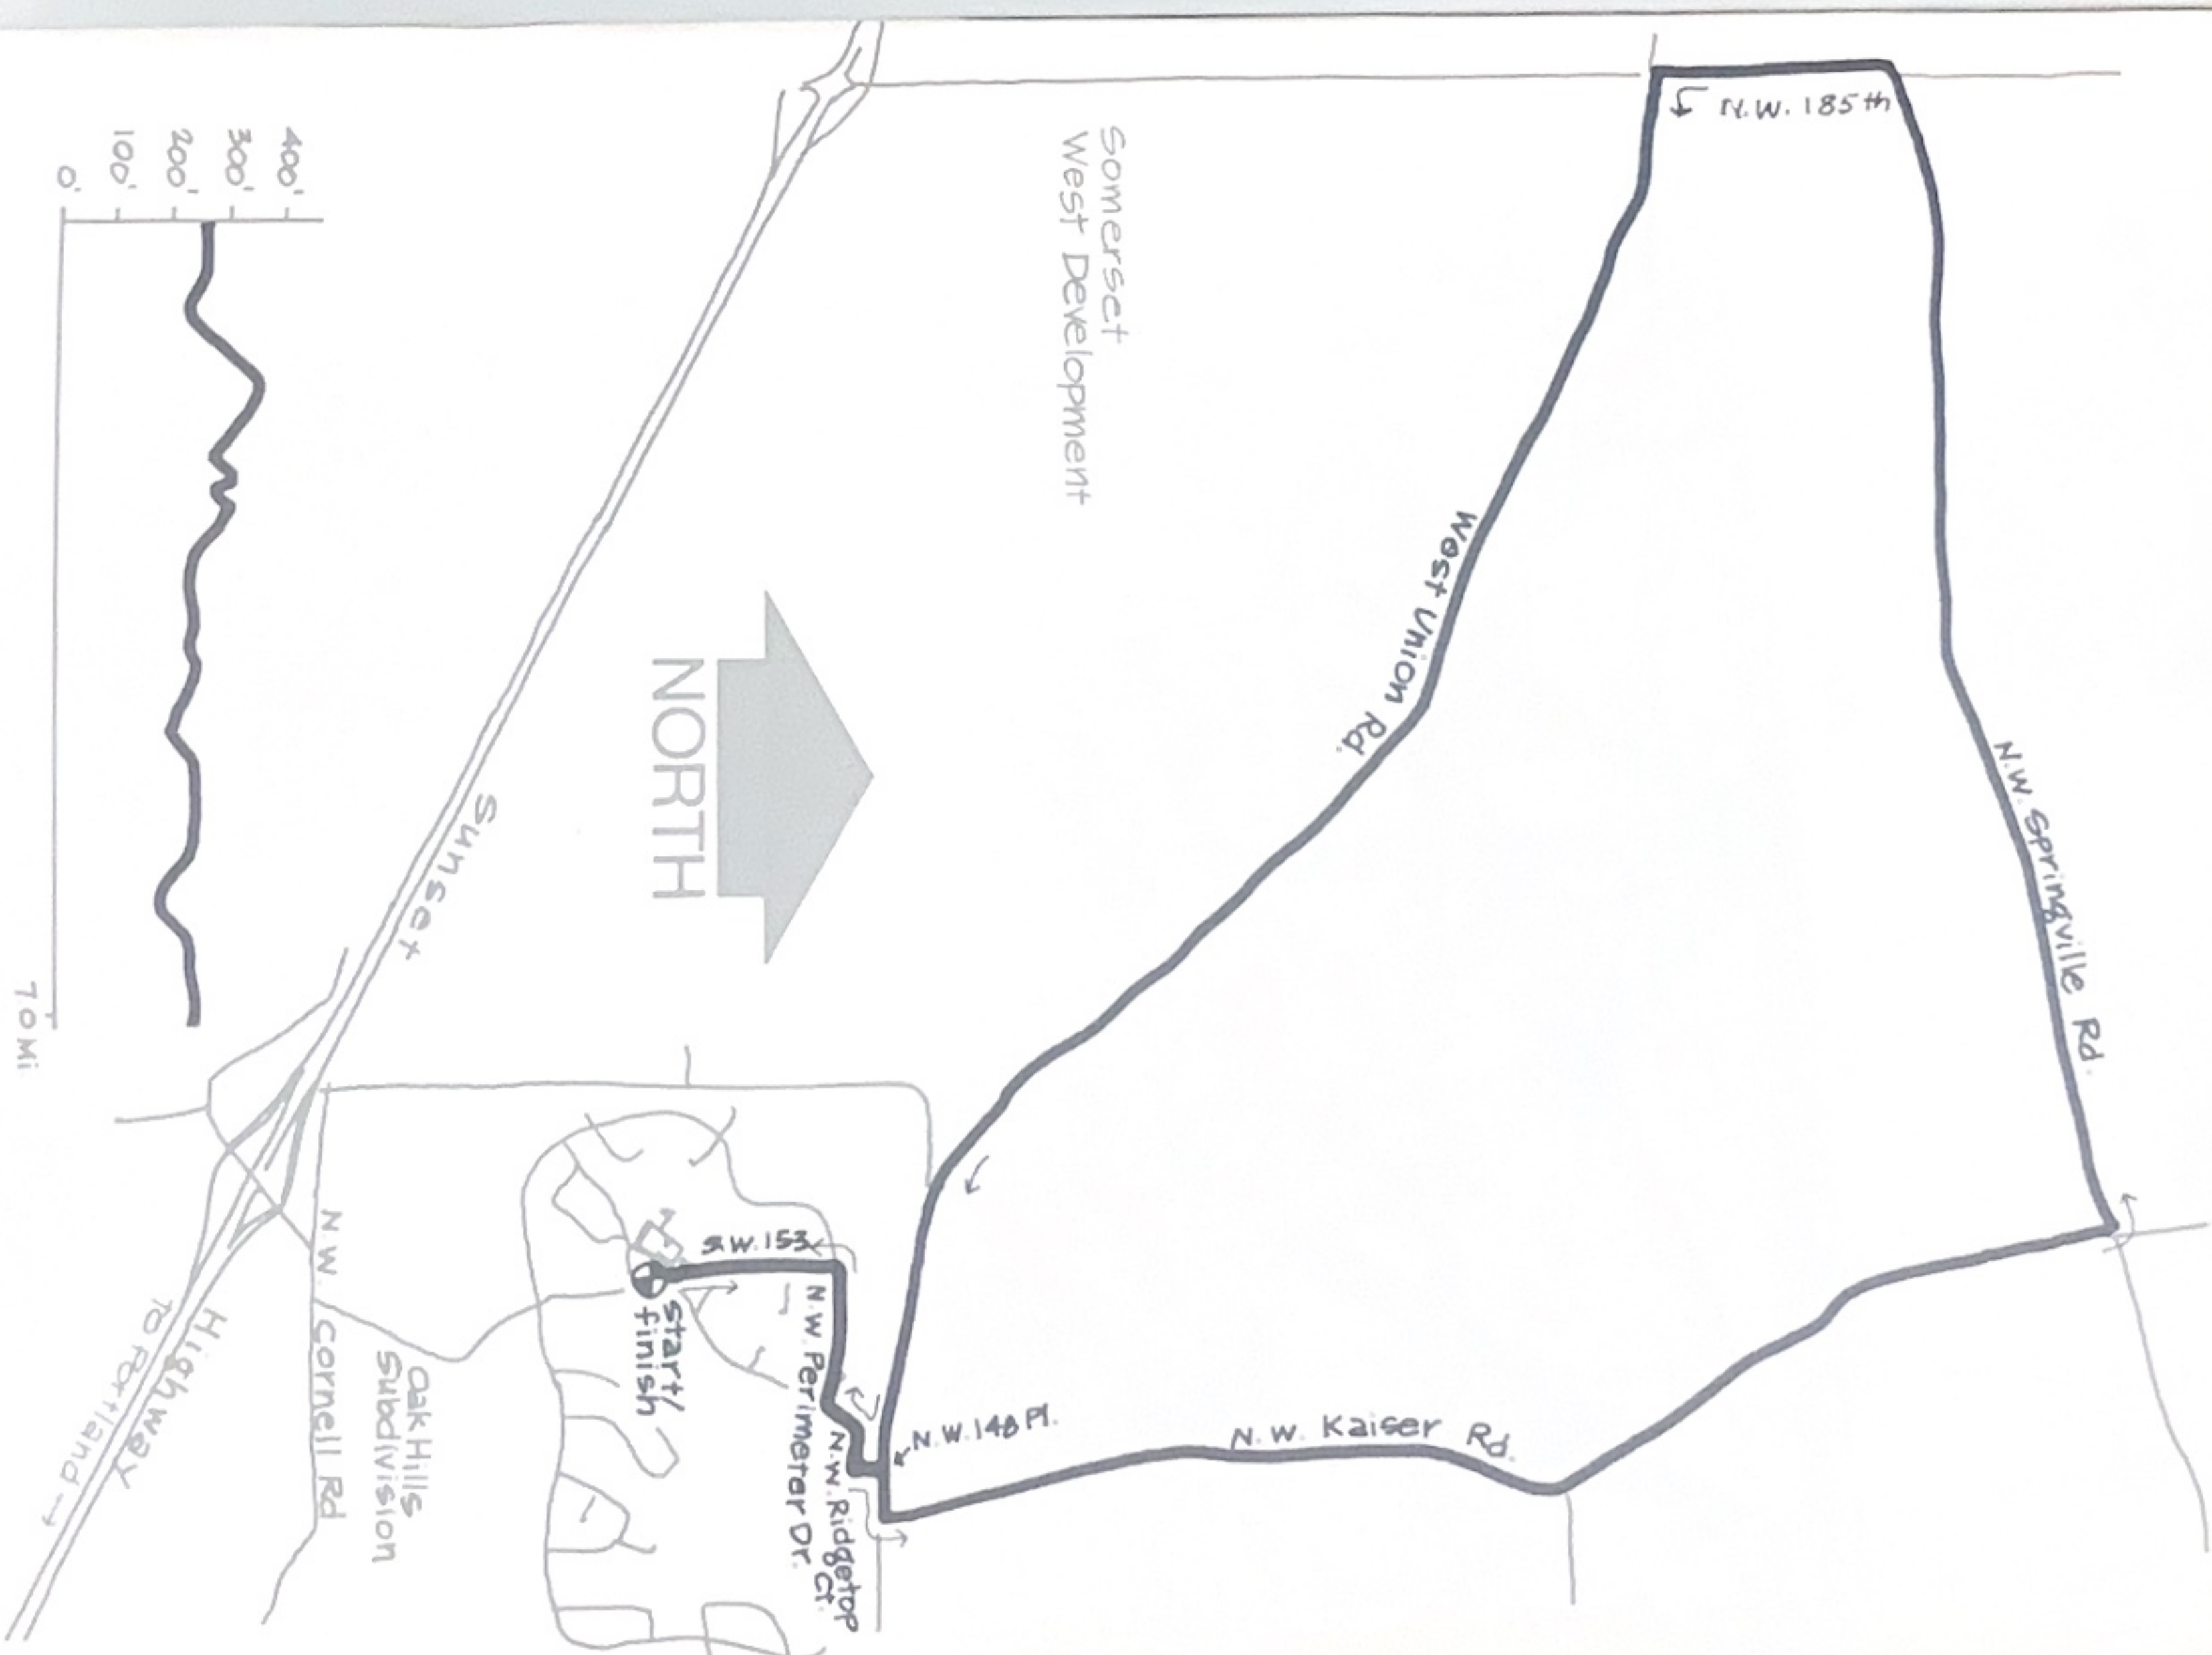

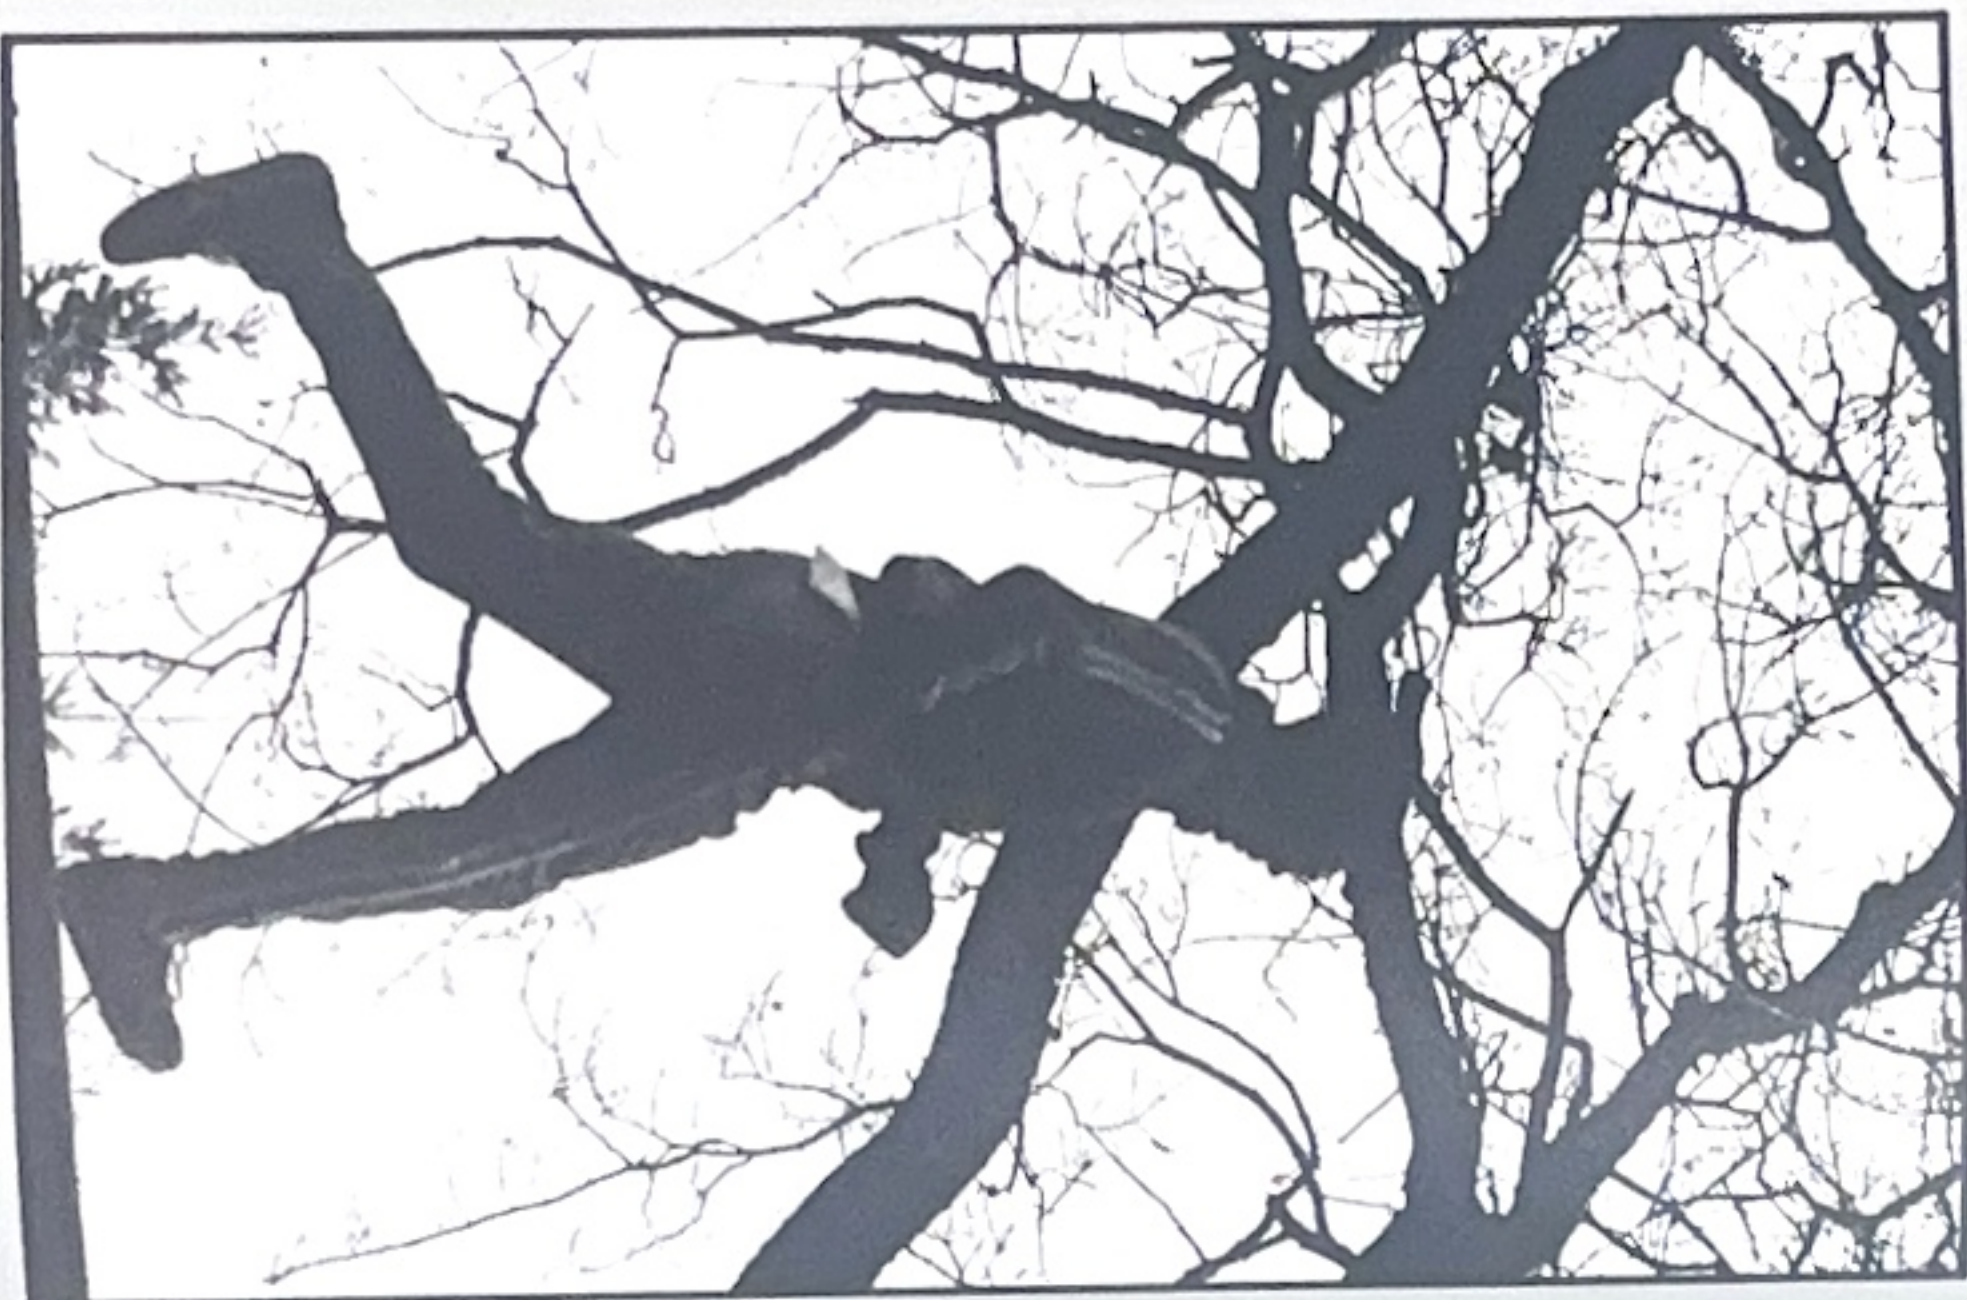

Paved roads

This beautiful Tualatin Valley loop, the setting for two annual ORRC runs, is a long time favorite of runners in the area and attracts many Portlanders who come out for a weekend outing. There are many fine vistas of the rolling West Union/Helvetia area farmlands.

Drive out Sunset Highway to the Cornell Road Exit. Turn right on Cornell, then left into the Oak Hills subdivision. Follow the road past the portals at the entrance and park at the school.

Start running north on 153rd and follow the map out the north side of the subdivision onto Kaiser Road, and you're in the country. Bring your own water, there are no restrooms. Try this charming loop at different times of the year -- it's an ever-changing delight.

2 (Most difficult = 10)

Beginning Point

Vancouver Lake Park

Conditions

(Best Conditions = 10)

Aesthetics - 8

Bad weather running - 10

Auto traffic - 8

Running Surface

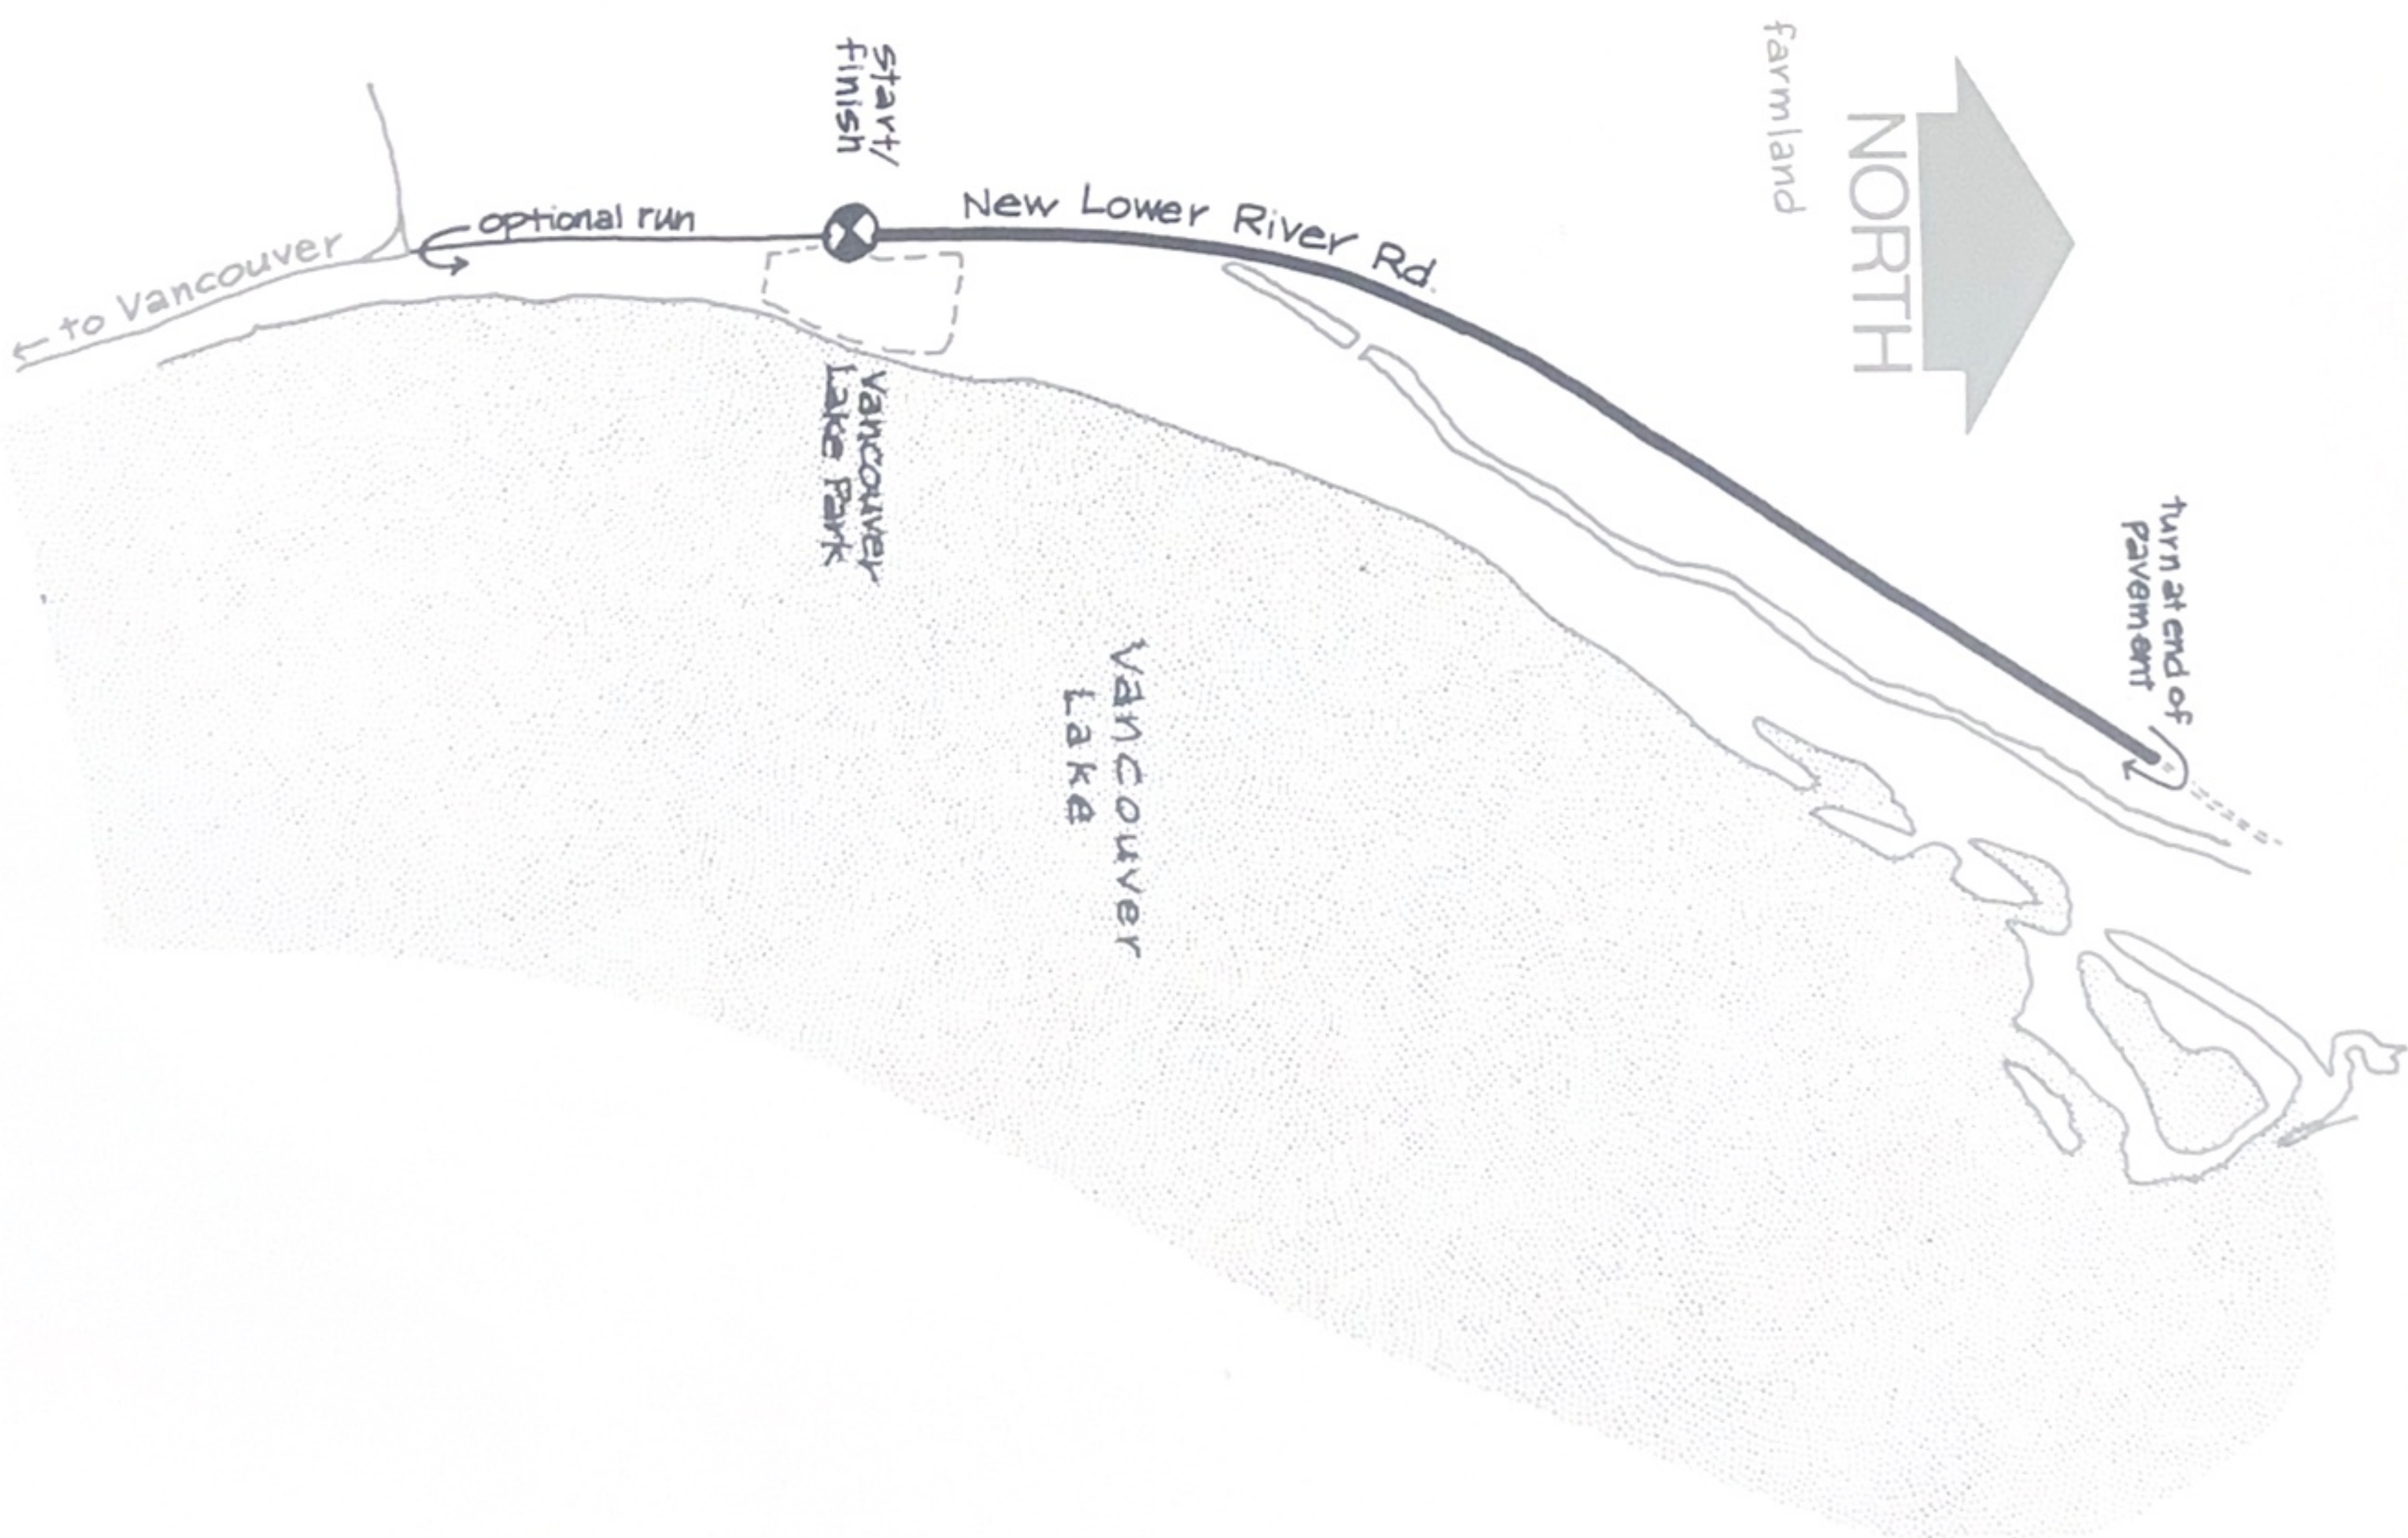

Paved road

Few Portlanders have ever seen Vancouver Lake -- a huge body of water lying only a few minutes from downtown Vancouver, yet curiously desolate in a way you can only appreciate by going there. This is a fine run if you're hunting for a rural stretch that is quiet, relatively scenic and flat as a pancake.

To get there, take the Fourth Plain Exit off I-5 in Vancouver and cross back over the freeway, bearing right in a few blocks to 26th. Drive west on 26th as it turns into Lower River Road and follow the BIKE PATH signs to Vancouver Lake Park. The park has restrooms, water and a phone.

Run north to the end of the pavement and turn around there. For an additional option upon returning to the park, continue on south to the "T" intersection and come back, adding another .6 mi (1 km.).

Running Surface

Paved roads

Some gravel

A year or so ago the ORRC publication,

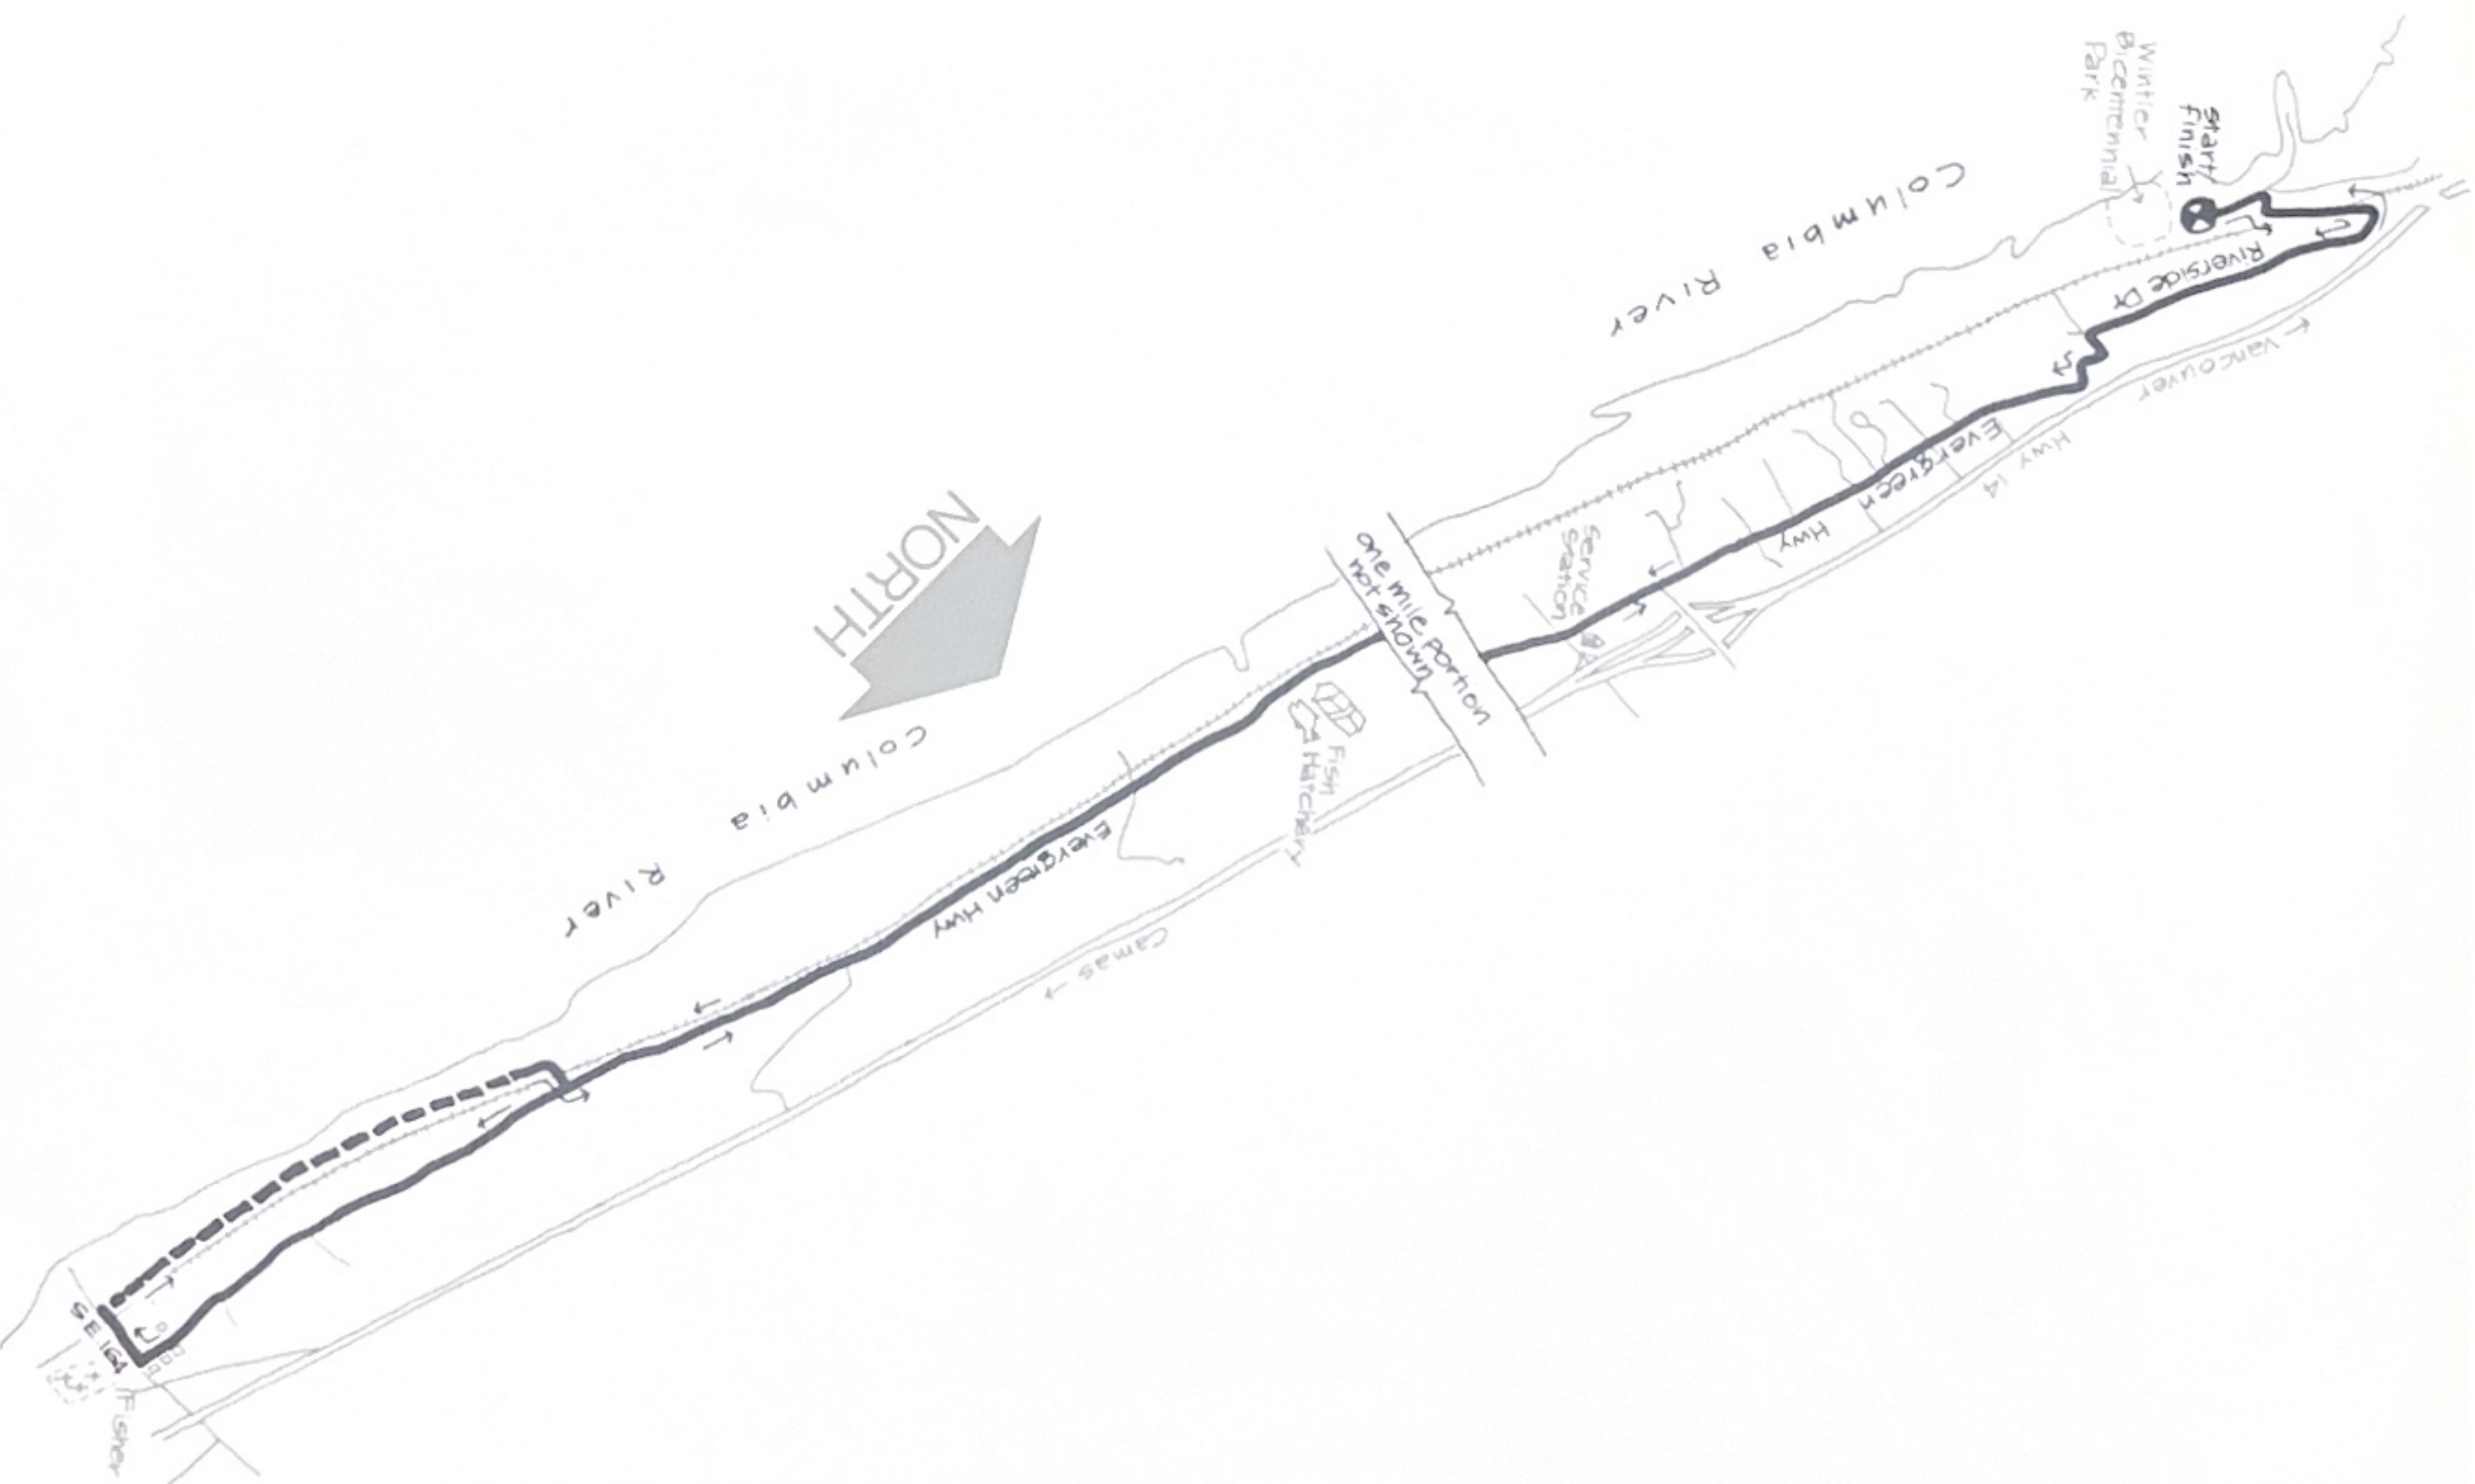

"The Oregon Distant Runner", invited readers to write in their descriptions of a favorite run. A Vancouver runner, Wes Christenson, was so ecstatic over this route that he devoted a 20 stanza epic poem to praising its virtues. This run - away from the tumult of the city - is undoubtedly the finest Columbia river course in the metro area.

Cross the Interstate Bridge, follow the signs to Camas and you're on Highway 14. Travel about three miles, turn off at the Evergreen Boulevard/Riverside Drive Exit, and follow the signs to Wintler Bicentennial Park.

The hard part is first, so start out running back up the hill the way you came, going right at the stop sign (following the BIKE ROUTE signs) to Riverside Drive. Run a half mile more to Chelsea Street, up the hill, and right to the Evergreen Highway. Now, shift into "automatic pilot" and remember everything you've read about meta-physical benefits of running. Coast along the flats and enjoy the Columbia, the wind, Mt. Hood and more.

Following the map, go up the highway, turn right at 164th, and come back along the railroad tracks. Water and restrooms are available at the Texaco Station.

Auto traffic - 6
Running Surface
Paved roads, asphalt paths

Here's a fine, easily accessible run linking a Vancouver city park with a park along the Columbia River. Cross the Interstate Bridge, take the exit to downtown Vancouver, and follow 6th or Columbia to the park.

Run down Columbia and turn left at the Quay Restaurant, running underneath the Interstate Bridge. Follow this road past the historic site (with a superb view of the river) and the industrial area, to the Marine Park. Take a loop around the park and enjoy the river view before retracing your steps. There are restrooms and water at the Marine Park.

42

Salmon Creek Loops

Distance

Running Surface

Paved roads

The longer of these two loops must certainly be in contention for one of the prettiest running routes in Clark County, and both have been used in Clark County Track Club events. There's something for everyone - residential neighborhoods, open farm land, rustic countryside, a county park, golf course, and, along the longer loop, fine view points of Salmon Creek canyon with its scenic bottom-lands.

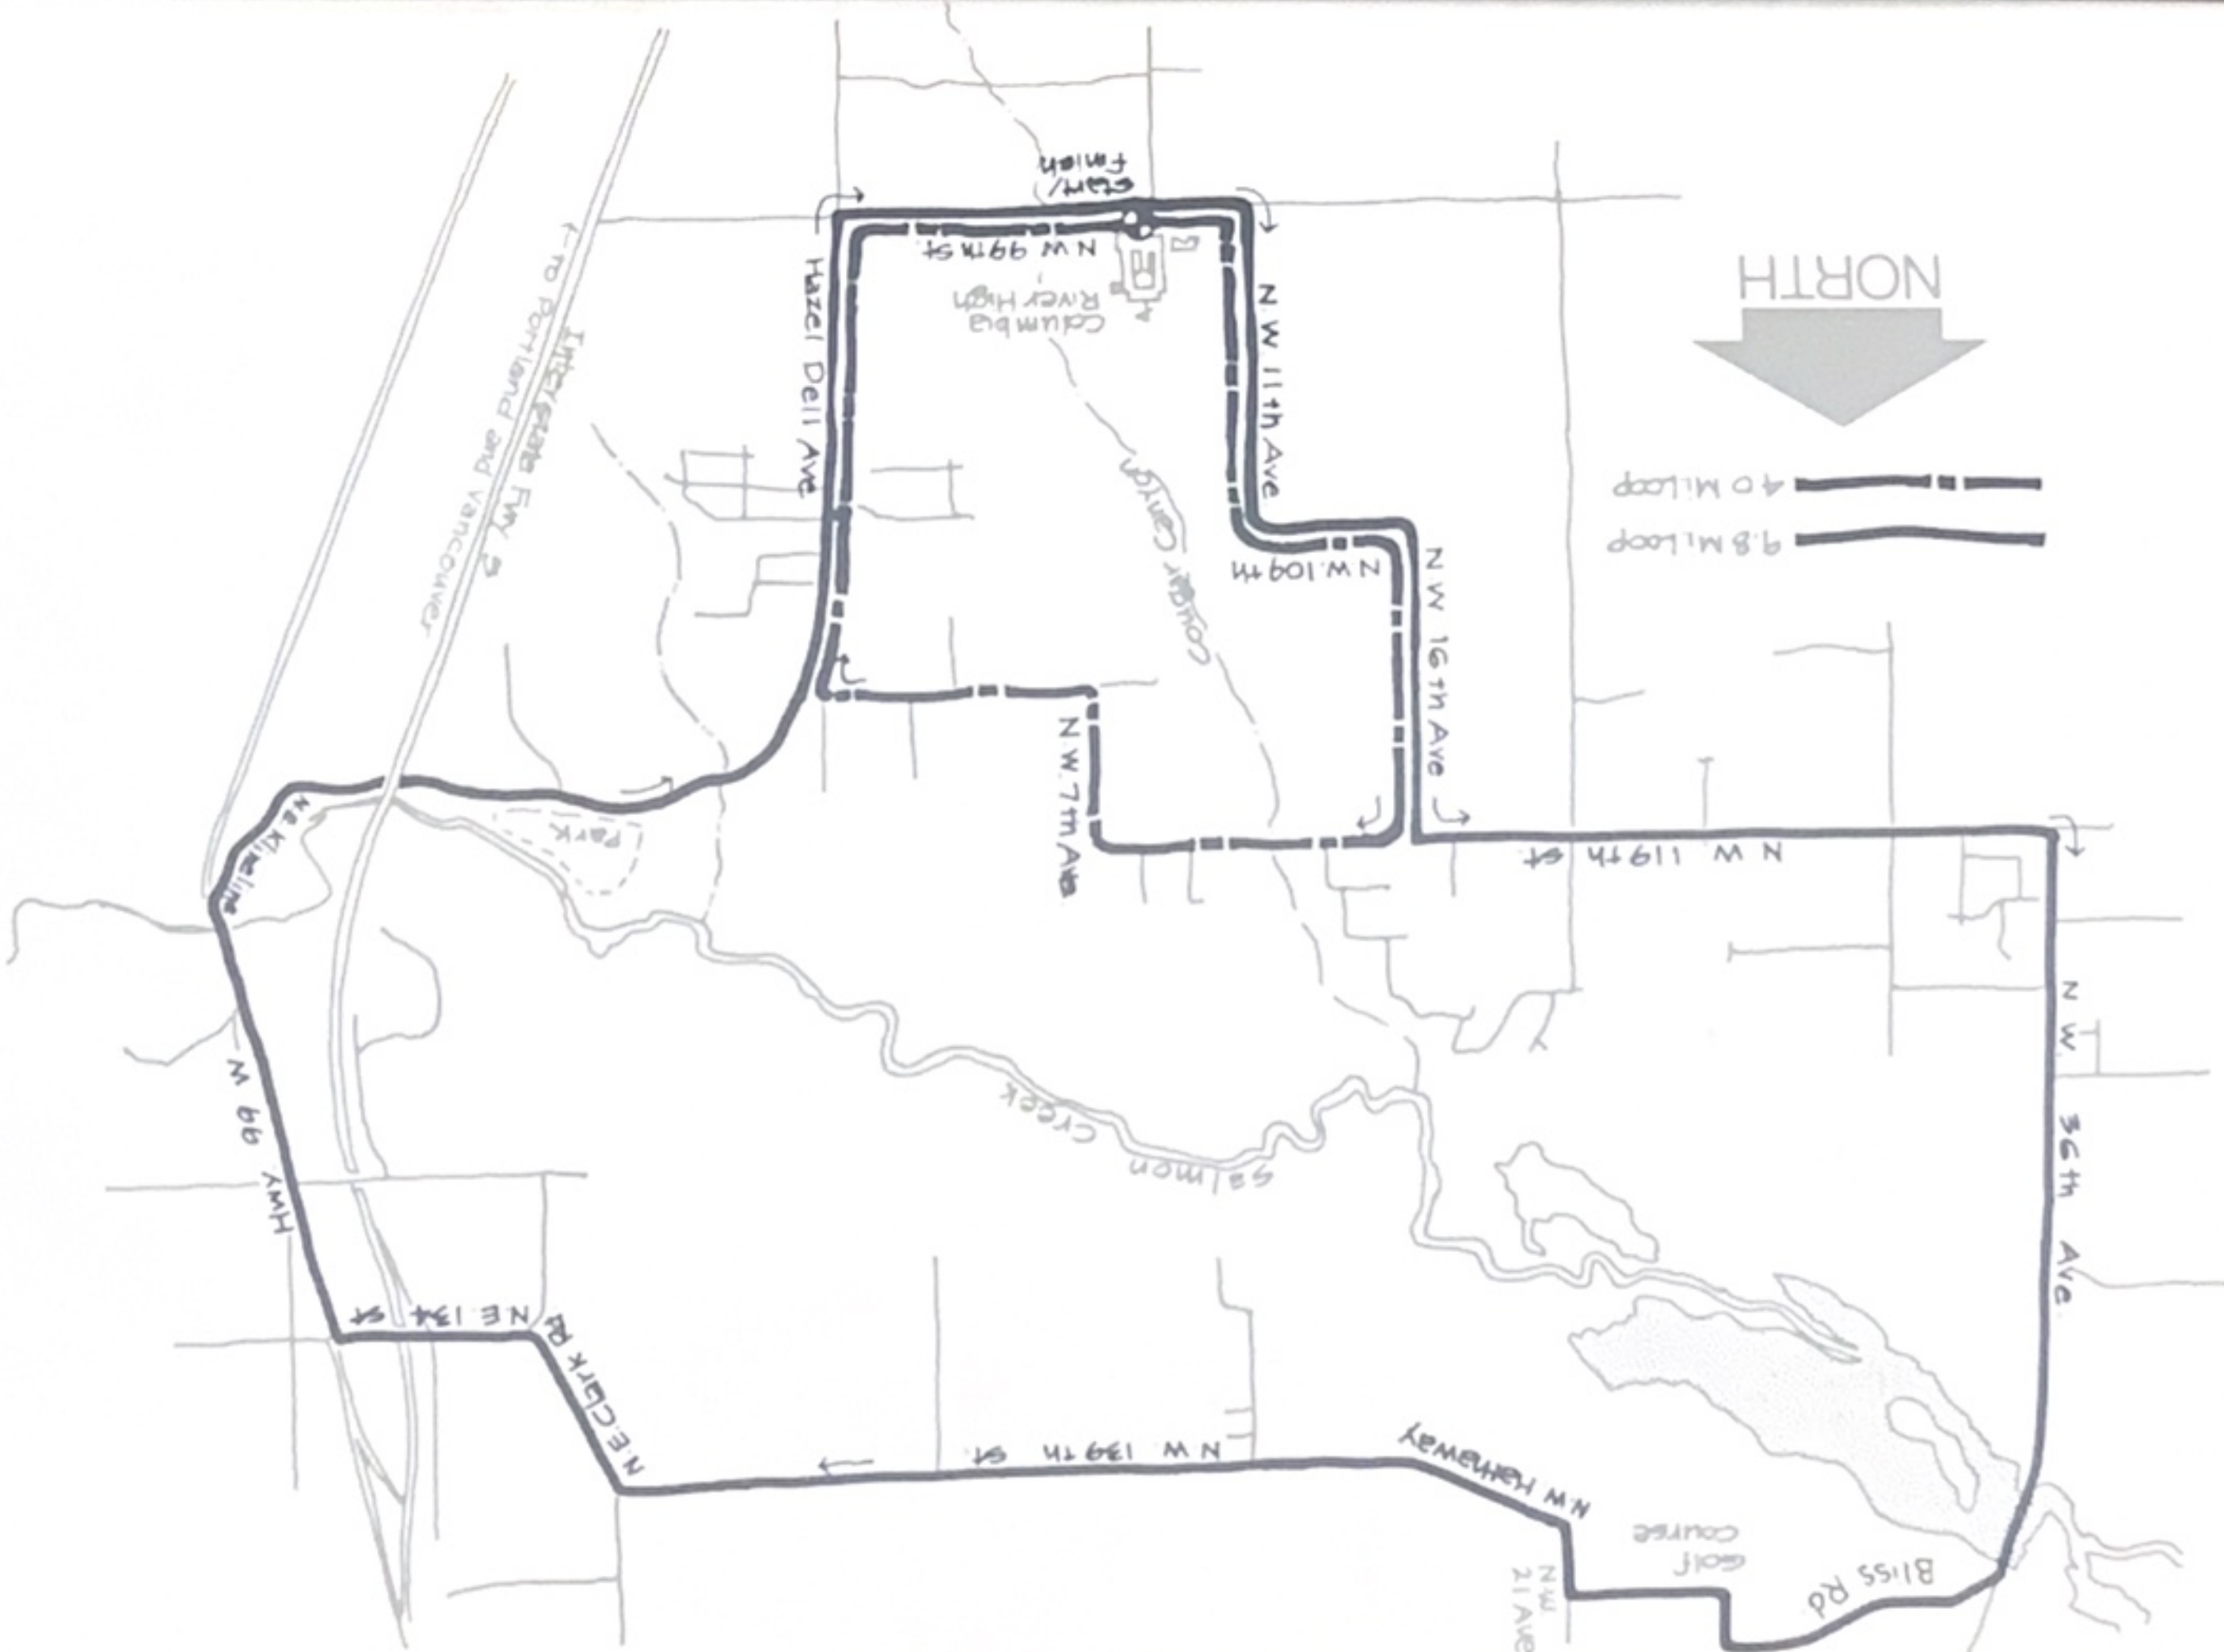

The easiest way to get there is to take I-5 north of Vancouver to the 78th Street exit. Go left over the freeway on 78th to 9th Ave. and right on 9th to the high school parking lot.

The run begins going west on 9th from the school, turning right on 11th. Follow 11th through the residential area as it breaks out into trees and fields. Both loops, short and long, get the experience of descending into canyons and climbing the other side. For the shorter loop, turn right at 119th, beginning your descent shortly thereafter into Cougar Canyon.

If you're really feeling your oats, turn left on 119th and stretch your legs and lungs on the longer loop. On N.W. 36th you pass through the charming unincorporated community of Felida with lovely views to the west of farmland and rolling hills. Shortly you'll begin your descent into the beautiful river bottoms and marsh area of Salmon Creek. Climbing up the other side, make sure you don't miss the first road (Bliss) angling up right along the canyon. After the sharp climb up Bliss, the run to 99W is fairly level.

As you're heading south on Hwy. 99W, take the first small road bearing right just after the bridge as you're liable to miss the sign (Klineline).

Facilities are in short supply, but there are stores and service stations on Hwy. 99W if needed. Suggested by: Lee Cave

43

Vancouver Barracks Loop

Distance

1.7 mi. (2.7 km.)

Difficulty

1 (Most difficult = 10)

Beginning Point

Parking lot at corner of McClellan and McLoughlin in the Vancouver Barracks

Conditions

(Best Conditions = 10)

Aesthetics - 7

Bad weather running - 10

Auto traffic - 8

Running Surface

Paved roads, sidewalks, grass

Want a short jaunt in an area steeped in historic lore and featuring many pre-1900 homes and buildings plus an authentic old fort? If this interests you, load everyone in the car and take I-5 over the Interstate Bridge and turn at the "Fort Vancouver National Historic Site" exit. Follow Mill Plane to Fort Vancouver Way, turn right, and drive 3 blocks south into the Barracks area. Parking is in the big lot across from the Armed Forces Lounge.

The run begins in the southeast corner of the parking lot, at the intersection of McClellan and McLoughlin. Start running west on McClellan toward the freeway. Run to the fence along the freeway, turn left, and follow it down to where the road ends (by the yellow fire hydrant). Go left here running straight east past the brick building on your right.

Fifth Street is a broad avenue with little traffic and good running on the shoulders or grass. Soon you'll pass an authentic replica of the original Fort Vancouver. On your left, and also a part of the Fort Vancouver National Historic Site (National Park Service), is a large grassy area and the Park Visitor's Center.

Coming back along Evergreen Blvd., you'll pass many old buildings from the military reservation, most in excellent condition and occupied by private organizations. Among these is the U.S. Grant Museum.

There are facilities at the Historic Site Museum and Visitor's Center, open in season. Suggested by: R.P. "Joe" Smith

LA

In terms of the rugged scenic grandeur for which the Cascade region is famous, these loops are perhaps the most spectacular in the book. They are the routes used in an annual run originally organized by Evergreen High School. The longer loop circles the lake, passing through woods and high plateau country under the vigil of Mt. St. Helens to the north and Mt. Hood to the southeast.

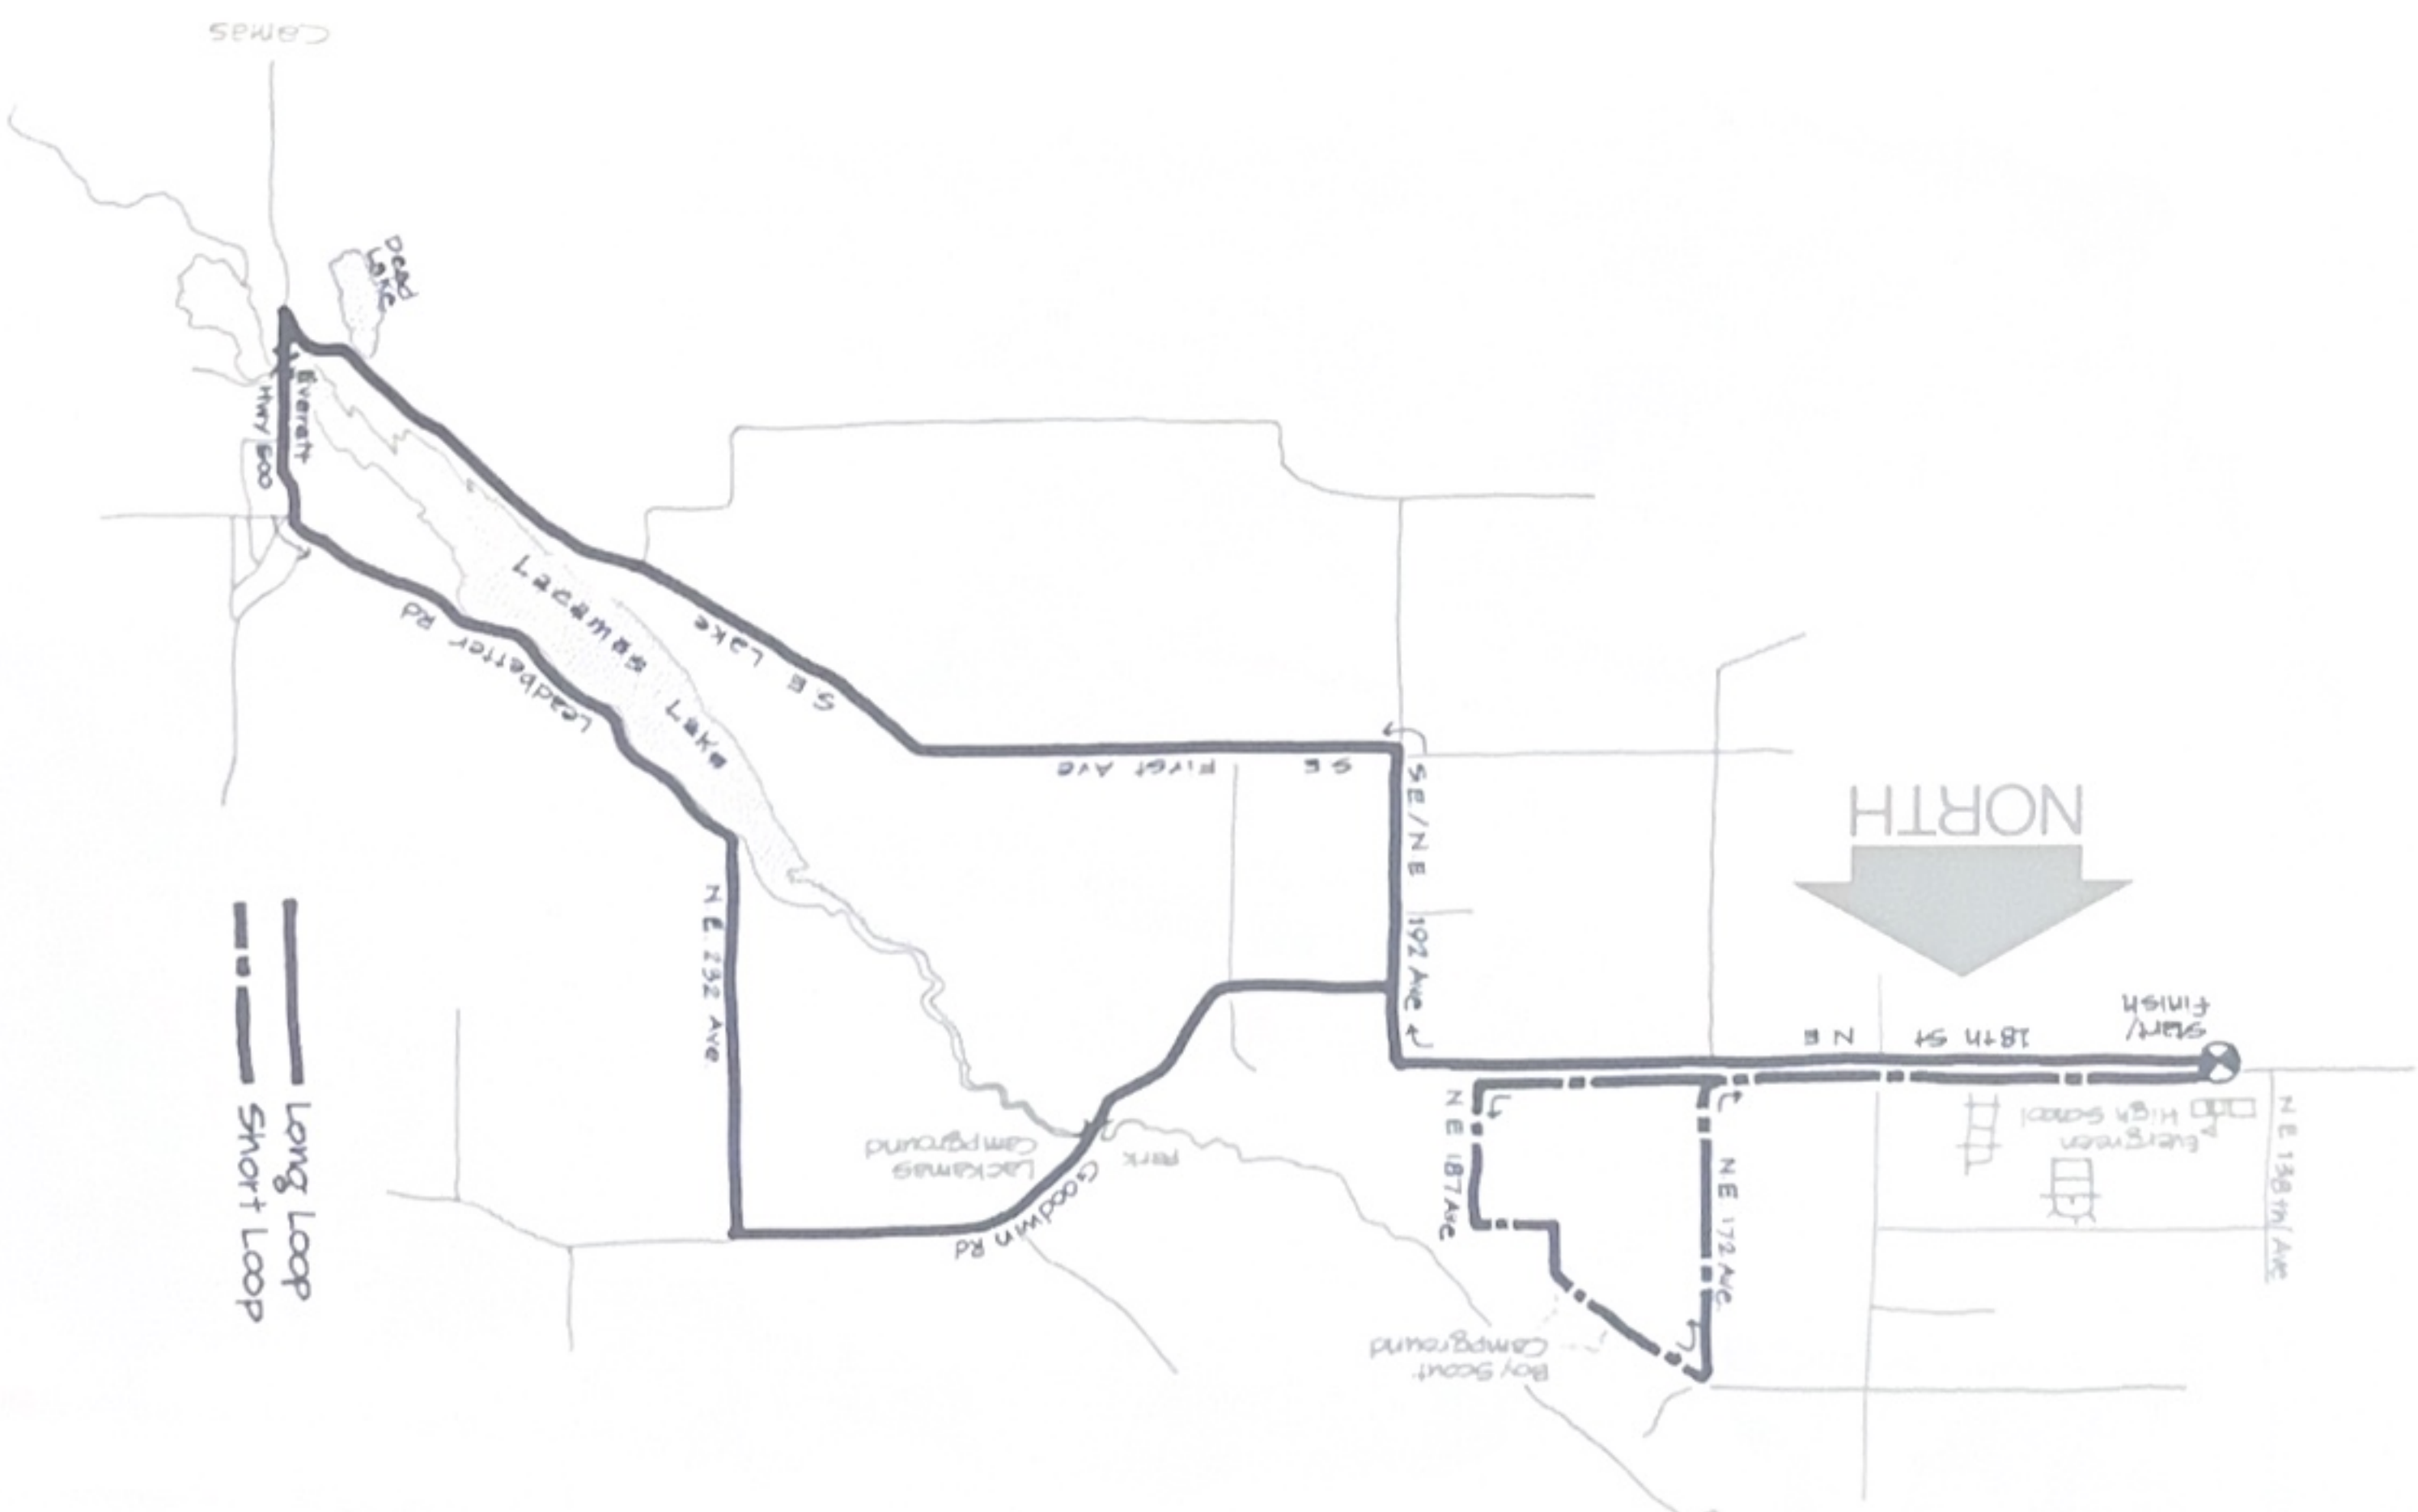

To get there, drive north over the Interstate Bridge and take the Camas/Washougal Highway heading east along the Columbia River. About 7 miles from the bridge, turn left at 164th and jog left on SE 1st to 162nd. Go north on 162nd another mile or so to 18th and left 3/4 mile to the high school. Park at the east end of the lot and set out from there, running back down 18th.

Follow the map, veering left on 187th to do the shorter loop and going right on 192nd to take the longer route around the lake. On the lake loop, you leave residential areas at around 202nd. Run up a long hill through broken woods and break out on a high open plateau circling high above the south-east side of the lake with splendid views of the lake, hills and mountains. Stay left at the first road fork and begin descending through trees to the lake. Just over the bridge at the east end, is a small community at around the 8 mile mark. A grocery/service station on your right offers the only water and sustenance along the entire route. On the north side of the lake you'll be running at near water level. The road is narrow but there is a good running shoulder on the left side.

On the return, run 100 ft. into the parking lot and you've got your 25 kilometers.

If you're in the mood afterwards, the lake is great for swimming.

Appendices

RUNNING ORGANIZATIONS AND PUBLICATIONS

Here are some non-profit organizations which are available to assist runners and joggers. They can provide you with such things as information on races and meets, help in organizing a road race, medical advice, suggestions on equipment and fitness testing

Oregon Road Runners Club (ORRC): A Portland-based statewide organization providing a range of activities for people interested in running. It is a non-elitist group that appeals to the weekend jogger as well as the Olympic hopeful. ORRC sponsors meets, races and "fun runs" year 'round. They provide technical expertise at no cost to groups or organizations interested in sponsoring runs. Yearly dues of \$7.00 includes their fine quarterly publication, "The Oregon Distance Runner." Address: P.O. Box D, Beaverton, Ore. 97005.

The Oregon Distance Runner: Quarterly publication of ORRC and one of the outstanding efforts of its kind in the country. General information on local running, relevant articles and interviews, schedules of upcoming events, and complete and accurate results of ORRC races as well as other significant state-wide events. Comes free with ORRC membership. Contact: "ODR", 2100 S.W. Jefferson, Portland, Oregon 97201.

Clark County Track Club (CCTC): This ORRC counterpart for Clark County, Washington, provides much of the same services and activities as ORRC does in Oregon. They sponsor several annual runs and events and put out their own publication to members. Address: 11801 N.E. 212th, Brush Prairie, Wash. 98606.

Long Distance Running Committee (LDR) of Oregon AAU: The purpose of the committee is, "primarily to permit those races (organized by local clubs, individual businesses, etc.) to occur by informing members of their existence." They sponsor 4 or 5 races a year and send their annual "AAU Long Distance Running Schedule" to all AAU members who list "LD" as their primary sport on the application. Their mailing address is Oregon Assoc. of AAU, 6128 S.W. 30th, Portland, Ore. 97201.

Road Runners Club of America: Well-known

running author, Jim Fixx, refers to RRCA as "the country's leading running organization." It's geared to the more serious runner, as opposed to the part-time jogger.

They have 125 chapters around the country, including Oregon Road Runners Club and Clark County Track Club. Membership in a local chapter includes their excellent periodical, "Footnotes." Address: 1115 Saffold Way, Reston, Virginia 22090.

National Jogging Association: This organization,

aimed more at the jogger than the serious runner, promotes many participatory motivational activities related to jogging and fitness. They claim 30,000 members throughout the country. \$15.00 membership includes their newspaper crammed with information and a discount on books. Address: 1910 K St., Washington D.C. 20006

YMCA Metropolitan Fitness Center: The center

is expensive to join and has a long waiting list. However, they have an active running committee which sponsors speakers, films, workshops, and two annual "fun runs", all open to the public. The Center's professionally equipped and staffed Cardiovascular Lab sponsors an Exercise Tolerance Test. This series of tests and evaluations, including a stress test, treadmill test and cardiovascular health screen, is probably the best way there is to determine your overall fitness level. The staff claims the data can even be used to predict your marathon time. The total package costs \$75 and needs a doctor's (or chiropractor's) referral. For either running information or the CV Lab call: 223-YMCA.

Portland State University Adult Fitness Program:

This program, administered by Dr. Mike Tichy, includes a moderate, sub-maximal stress test open to all members of the class. The adult class is open to the public and meets from 5:00-6:00 P.M. Mondays, Wednesdays and Fridays. Cost is \$35.00 a quarter. Call: 229-4989.

Cardio And Pulmonary Research Institute (CAPRI):

This six-year-old organization specializes in heart attack patients or people with a heart history or heart trouble. They offer a complete diagnostic program and maximal stress test followed by an exercise regimen tailored to fit the individual. Fitness classes are offered three times a week and include administration of two EKGs per class. The director is Rebecca King. Call: 223-5406

Third Saturday	Kilometers For Kids Run	10 km., 3 km.	Blue Lake Park, east of Portland
Third Sunday	CCTC Turkey Trot	3.8 mi., 1.2 mi.	Army Barracks area, Vancouver, Wash.
Third Sunday	Gobble Jog	3.0 mi. +	Mt. Hood Community College, Gresham, Ore.

November Cont.

Last Saturday	Pilgrimage Marathon	26 mi., 385 yards	Phoenix High School, Phoenix, (Southern) Ore.
Sunday - two weeks before Portland Marathon	CCTC One-half Marathon	13.1 mi.	Columbia High School Academy, south of Battle Ground, Wash.
Last Sunday	ORRC Portland Marathon	26 mi., 385 yards	Univ. of Portland, North Portland

DECEMBER

Winter Solstice (check running schedule or almanac for exact date)	Mud Grand Prix	6.75 mi.	Wallace Park, N.W. Portland
First Saturday	Lake Oswego Run	8 mi.	Lake Oswego High School, Lake Oswego, Ore.
First Sunday	CCTC Baracks To Wintler Park	6 mi., 2 mi.	Army Barracks area, Vancouver, Wash.
Second Saturday	ORRC Oak Hills Run	7 mi., 2 mi.	Oak Hills School, west of Portland

Aerobic Point Tables

The following tables give aerobic point values for walking and running distances from one to ten miles at 1/2 mile increments. From ten to fifteen miles the increments are given at the mile mark, with the exception of the 12.5 mile distance. For more detailed increments to 1/10 mile, see the appendix to "The New Aerobics," by Dr. Ken Cooper. Data used in the tables were obtained directly from the Institute for Aerobics Research and are somewhat revised from the tables in the book. Point scores are in the third column.

1.0 Mile		
over	20:00	.00
15:00	- 12:01	2.00
12:00	- 10:01	3.00

Buzz Willis and John Perry have a combined total of 25 years of running. Both are marathoners and can usually be found somewhere near the middle of the pack in local running events. Over the years they have collected good running routes in much the same way as some people collect stamps or rare wine. This, their first book, is a chance to share some of their discoveries.

Buzz, when he is not running or talking about running, is a social planning consultant and writer with varied interests including mountain climbing, yoga, and good food. He produced most of the written material in the book.

John did the maps and coordinated the graphics. In real life he is an architect and planner, father of three and lover of the great outdoors – always in quest of the good life and a cure for his sore hamstrings.

\$6.95

Running Around Portland describes with words and maps over 50 of the best running routes in the Portland-Vancouver region. The book includes a large, fold-out map of Forest Park and Hoyt Arboretum; a schedule of annual running events in the area; plus many other items of interest to local runners. Throughout the book are photographs of some of our most beautiful runs by photographer Ancil Nance.
